Assad Hamid

Transportation Planning & Management | Dalian University of Technology

Dalian, China | assadhamid98@gmail.com | Academic website | LinkedIn | ORCID

Interests: pedestrian safety, transport-demand modelling, and equitable urban mobility.

EDUCATION

Master of Engineering, Transportation Planning and Management

Dalian University of Technology, China | September 2024 - July 2027 (expected)

Research direction: pedestrian safety at urban unsignalized intersections using Graph Neural Networks and trajectory-based traffic conflict analysis.

Bachelor of Civil Engineering

National University of Sciences and Technology, Pakistan | September 2017 - June 2021

Final-year project with Punjab Metrobus Authority: effects of fares, travel-time variability, and COVID-19 disruption on Rawalpindi Metrobus ridership.

SELECTED PROJECTS

Metrobus Accessibility & Transport Equity Analysis

- Mapped transit coverage and walking accessibility in Islamabad using population and geospatial data.
- Identified gaps in access for low-income communities to inform equitable transport planning.

U.S. Crash Severity Analysis

- Analyzed crash, vehicle, and person records to examine factors associated with injury severity.
- Translated road-user and collision patterns into targeted safety recommendations.

Proposed M-7 Motorway - Traffic Feasibility Study

- Modelled and calibrated corridor traffic to assess diversion and travel-time changes under the proposed motorway scenario.
- Estimated operating costs, forecast demand, and evaluated mainline capacity and level of service.

TECHNICAL SKILLS

Data analysis: Python, SQL, Power BI / DAX, advanced Excel (Pivot Tables, Power Query, VLOOKUP / INDEX-MATCH).

Geospatial analysis: QGIS, OpenStreetMap. **Traffic software:** PTV VISUM.

PROFESSIONAL EXPERIENCE

Project Engineer - MAK Contractors & Associates

Rawalpindi, Pakistan | July 2023 - August 2024

- Managed a 100-room Serena Hotel renovation and procurement of construction materials and finishing supplies.
- Compared vendor quotations, negotiated rates, and coordinated hotel management, contractors, and suppliers; tracked deliveries against critical-path activities using Microsoft Project.
